SPECIAL SERVICES MEMORANDUM - 204

Construction -61

SUBJECT: Electric Utility Connections

On May 12, 1945, the War Production Board revoked all Supplementary Orders in the U-1 series. Extensions of electric utility lines and connections to farms will no longer be controlled by Orders U-1-c, U-1-d, U-1-f, U-1-g, or U-1-i or by provisions of Office of War Utilities Administrative Letter WPBI-2943, dated April 19, 1945.

Effective immediately on receipt of this memorandum Committees shall discontinue (1) the certification of animal units on farms as formerly required under Order U-1-c, (2) the certification of eligibility for irrigation connections formerly made under U-1-i and (3) recommendations to WPB for appeal cases which did not qualify under existent orders.

Special Services Memorandum 202, Construction 60, dated April 28, is made inactive by the above action and is superseded by this memorandum.

Utilities may now make electric extensions and connections as they desire without WPB approval, being limited only by Order U-1 which automatically permits expenditures up to \$25,000 for materials for minor capital additions. A minor capital addition can include any continuous extension of lines.

Utilities are not required to give preference, in making connections, to farmers who have outstanding certifications from County Committees issued prior to May 12. However, they are urged to do so as indicated by the following excerpt from Office of War Utilities Administrative Letter, WPBI-3006, dated May 12, 1945:

"In scheduling the construction of electric extensions to serve farm consumers, it should be recognized that increased food production will continue to be urgently required during the coming months. Utilities should therefore continue to give preference to extensions of service to farms where the use of electric power can be expected to result in a substantial increase in farm production or in a substantial saving in farm labor. Although it is planned that no more "animal unit" certifications will be issued by the County Agricultural Conservation Committees, outstanding certifications should be taken as a guide in determining precedence as to rural extensions. It is expected that materials for electric extensions will continue in short supply for some months to come and it is essential that electric power producers avoid duplication of lines and other construction undertaken for the principal purposes of expanding service areas".

The above action has no effect on present procedure for handling the copper wire program.

SPECIAL SERVICES MEMORANDUM - 205

Machinery Rationing - 158
Supplement - 2

SUBJECT: Program to Facilitate the Exchange of Custom Harvesting
Units between the United States and Canada

The United States-Canadian custom combine program for 1945 is of primary interest to the States of Texas, Oklahoma, Kansas, Colorado, Wyoming, Montana, North Dakota, Minnesota, South Dakota, and Nebraska.

Attached to Special Services Memorandum-90, Machinery Rationing-145, Supplement 1, was a copy of a document setting forth the provisions of an arrangement made by our Government and the Canadian Government for the purpose of facilitating exchange of custom harvesting units between the two countries during the 1944 and subsequent wartime harvesting seasons.

A recent exchange of correspondence between the two Governments formally approved the program for the 1945 harvesting season and authorizes Canadian working units to enter the United States on June 1, 1945. Last year the date on which Canadian working units could enter this country was July 7. The date on which Canadian working units are to return to Canada is September 15, which is the same as that for 1944. Canadian authorities state that they will be glad to consider individual applications for working units to remain in this country later than September 15.

With the exception of the change of the July 7th date to June 1st, the appropriate changes in year date, and the changes in names and addresses of two of the three Canadian officials through whom requests for assistance and notifications of availability of working units will be cleared, (new officials listed below), the instructions contained in Special Services Memorandum-90, Farm Machinery Rationing-145, Supplement 1, and attachment to that memorandum, will govern for the 1945 United States-Canadian custom combine program.

Mr. H.R. Richardson, Director, Farm Help Service, Provincial
Department of Agriculture, Winnipeg, MANITOBA
Mr. Morris Hartnett, Director, Agricultural Representatives, Provincial
Department of Agriculture, Regina, SASKATCHEWAN

Three copies of Special Services Memorandum-90 and attachment will be forwarded to each of the States listed in the first paragraph of this memorandum.

Surplus War Property - 12

SUBJECT: Surplus Property Board Regulation 3

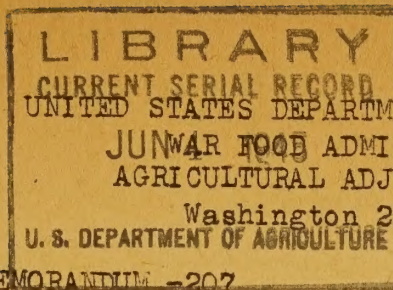

Copies of Surplus Property Board Regulation 3, "Dispositions of Surplus Property in Rural Areas and to Farmers" are being forwarded each State office in quantities sufficient to furnish two copies to each County AAA office and 30 copies for each State AAA office.

SPB Reg. 3 is based on Section 17 of the Surplus Property Act of 1944.

Operational procedures are being developed in cooperation with the Department of Commerce and will be forwarded to State offices at a later date.

SPECIAL SERVICES MEMORANDUM -207

Administrative -5

SUBJECT: Discontinuance of all Functions in connection with the Farm Transportation Program

After June 30, 1945, funds will not be available for work in connection with the Farm Transportation Program. Therefore, all work in connection with this program, including assistance given to farmers on applications for truck tires, tractor tires for replacement and conversion, new trucks, and off-highway gasoline, will be discontinued beginning July 1, 1945.

Farmers should be informed that after June 30 the Office of Price Administration and the Office of Defense Transportation will handle their programs without assistance or recommendations from AAA Committees. Copies of OPA and ODT instructions to their field offices will be forwarded to each State Office as soon as such instructions are available.

Effective July 1, 1945, the following Special Services Memorandums will be inoperative, and may be removed from your active file:

<u>Special Services</u> <u>Memorandum Number</u>	<u>Subject Matter</u>
58	Tractor Tire Size Substitution
63	Reporting Quota or Tire Shortages
66	Transportation Handbook, Revised
107	Revised Procedure Steel-wheeled Conversion
117	Transportation of Migratory Farm Labor
138	Use of "R" Coupons
144	Fuel for Commercially Operated Farm Vehicles
172	Production of Light Trucks
*194	Reports on Conversions
198	Truck Tires for Limestone and Fertilizer Trucks
199	Tractor Tire Situation

*The tractor tire conversion report for the month of June should be submitted to complete the records.

In connection with the 1945 Custom Combine Program applicable in the Great Plains States, Parts I, II, III, and V-A of Special Services Memorandum 90 (See Special Services Memorandum 197) will become inoperative after June 30, 1945, and should be deleted.

SSM-208

May 18, 1945

SPECIAL SERVICES MEMORANDUM - 208

Supplies - 56

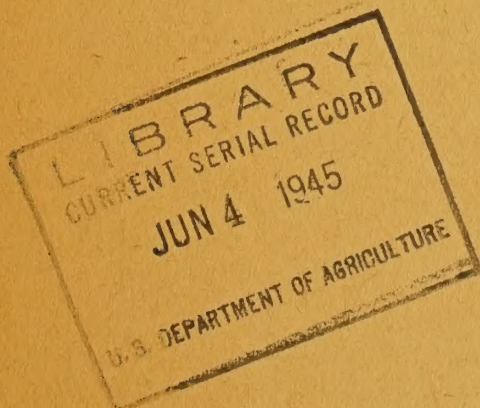

SUBJECT: Procurement of Mechanically Refrigerated Farm Milk
Coolers

This memorandum supersedes Special Services Memorandum-154, Supplies-54, subject: "Procurement of Mechanically Refrigerated Farm Milk Coolers."

WPB Order L-38, which controls production and distribution of refrigeration equipment including complete farm milk coolers and mechanical units for farm milk coolers, was revoked on May 12. Farmers may now purchase mechanical milk coolers, or units, without certification or WPB priority ratings. In some instances, until manufacturers are able to step up production, supplies may not equal the demand.

There has been developed for emergency use a procedure which may be applied under certain conditions. Under this procedure the farmer must have tried to purchase a cooler, or unit, from at least three sources and must have been unable to obtain delivery or promise of delivery. The farmer may then apply to the Regional office of the War Production Board on Form WPB-541 for an emergency rating. It is not anticipated that the emergency procedure will be used to any extent as a rating will require the dealer to deliver to the holder of the rating before delivering to other users who have orders on file. The case must be strong enough to warrant such action before the War Production Board will assign a rating.

The War Production Board will carefully analyze applications for emergency ratings to determine whether there is real need for the equipment and whether there will be a substantial spoilage of milk if the rating is not issued.

SPECIAL SERVICES MEMORANDUM - 209

Construction - 54
Supplement - 5

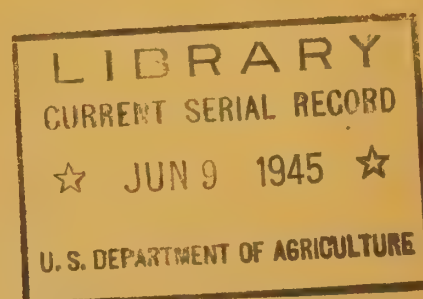

SUBJECT: First Quarter, 1945 Copper Wire Issuance

The War Food Administration received an allocation of 1,250,000 pounds of copper wire for distribution to farmers for farmstead wiring during the first quarter of 1945. Certificates were issued by County Committees during this period for a total amount of 1,321,718 pounds. The W.F.A. was able to have a sufficient amount of copper transferred to this program from other agricultural programs to cover the overissuance. Since a transfer will not be possible during the current quarter, committees must not overissue their allotments.

Below is a summarization by States and Regions of the issuance of copper certificates during the first quarter.

STATE	Original Quota (pounds)	Final Quota (pounds)	Amount Issued (pounds)	Percent of Final Quota Issued	Average Lbs. per CMP L-361 certificate

SSM-210

May 21, 1945

SPECIAL SERVICES MEMORANDUM - 210

Construction - 62

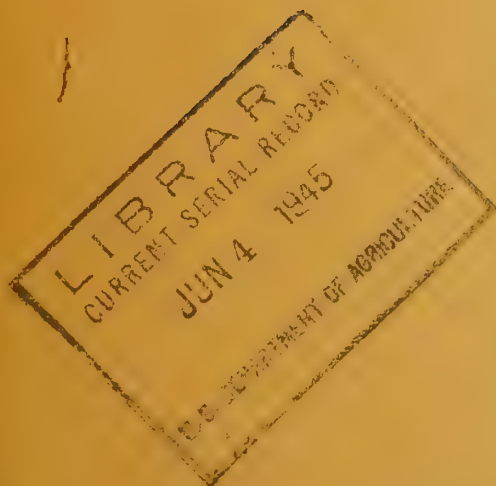

SUBJECT: Farmer's Lumber Certificates

The War Food Administration received a lumber allotment for the first quarter of 1945 in the total amount of 291,000,000 board feet. Of this amount, County Committees issued certificates for 258,230,389 board feet or 89 percent of the allotment.

Attached is a summarization by States and Regions of the issuance of lumber certificates during the first quarter of 1945.

Several States have over-issued their quotas. Every precaution must be taken to guard against over-issuance. If a State's quota is in excess of its needs, the excess quota should be returned to the Washington reserve promptly.

SPECIAL SERVICES MEMORANDUM - 211

Surplus War Property - 12
Supplement 1

SUBJECT: Surplus Property Board Regulation - 3,
Operational Procedures

The Surplus Property Board has issued SPB Reg. 3 to effect disposition of surplus property in rural areas and to farmers. This memorandum is issued to provide AAA operating procedures to implement the provisions of that regulation. Attached is a copy of a memorandum from A.U. Fox, Director, Office of Surplus Property, Commerce Department, to all Regional Directors, a copy of SPB Reg. 3, and a copy of the certificate to be issued by County AAA Committees to farmers and farmers' cooperative associations for use in purchasing trucks. Copies of the certificate should be reproduced in the field. The procedures outlined in this memorandum are familiar to the Office of Surplus Property, Commerce Department, and should serve as a uniform procedure to be followed in all areas in carrying out the provisions of SPB Reg. 3.

- I. MISCELLANEOUS PROPERTY - Section 8303.3 of SPB Reg. 3. Based upon information procured from the County Offices, the State AAA Committees will keep the AAA liaison representative currently informed of the types and quantities of any property needed in rural areas.

The AAA liaison representative shall consult with the Regional Office of the disposal agency and assist in developing measures which are in agreement with Office of Surplus Property operating procedures that will cause appropriate quantities of surplus property to be sold or channeled into rural areas.

With reference to the types of property listed in Exhibit A, the areas of need and the quantities needed to assure utilization of the agricultural resources of areas shall be reported currently, in writing, to the Regional Office of the disposal agency by the AAA liaison representative. A copy shall be forwarded to the AAA Regional Office.

- II. TRUCKS, FARM MACHINERY AND EQUIPMENT - Section 8303.4 of SPB Reg. 3. This section provides that reasonable quantities of surplus trucks, machinery, and equipment shall be made available for disposal in rural areas to farmers and farmers' cooperative associations whenever a shortage of such items impairs, or threatens to impair, farm production. However, until further notice, the following procedure will be applicable to trucks only.

- A. Responsibilities of AAA Liaison Representatives. The responsibilities of the AAA liaison representatives in carrying out the

(Over)

provisions of SPB Reg. 3 include, but are not necessarily limited to, the following:

1. After State Committees have furnished information regarding impairment or threatened impairment of farm production, and upon receipt of information that surplus property is available, telegraph or otherwise immediately communicate with the AAA Regional Director, giving the total quantities by types and sizes of property available. Also recommend the specific areas; and, based on the amount of property available, recommend the quantities, by types and sizes, needed in each area to prevent impairment of production. The date and number of Office of Surplus Property notification form issued by the disposal agency should be included in the communication.
2. Upon receipt of information that an Order has been issued by the Surplus Property Board wherein property is allocated to areas in the Region, consult with the disposal agency regarding the determination of what property is to be allocated.
3. After the property has been selected, consult with the disposal agency to determine the date on which the property will be sold.
4. Inform the State AAA Committee of the quantity, by types and sizes, of the property allocated to designated areas within the State, and the date the sale will be held.
5. Arrange to receive from the disposal agency copies of sales contracts executed at the sale, or in the absence of such copies summaries of the information appearing on the contracts, and have copies of contracts or summaries furnished to the appropriate State Committee.
6. Arrange to procure from dealers who purchase trucks, the names of counties in the designated area in which they wish to sell the trucks to holders of AAA certificates, and to furnish that information to the appropriate State Committee. In most cases this responsibility, and that contained in item 5 above, should be assumed by the State Committee representative attending the sale.
7. Furnish the AAA Regional Director copies of all correspondence, including any agreements with representatives of disposal agencies, and keep the AAA Regional Director otherwise informed of activities by reports in writing.
8. All communications to the Regional Office should be directed to the Regional Director of the AAA Region to which the liaison representative is assigned, even though some communications may relate to a State which is in another AAA Region.

B. Responsibilities of State AAA Committees.

1. Based upon information obtained from county committees and other sources, determine the areas, by counties, where farm production is impaired or threatened to be impaired because of shortages of trucks, farm machinery and equipment. This information must be kept current.

2. Determine the quantities, by types and sizes, of property needed within the areas to relieve or prevent impairment of production.
3. Immediately notify the AAA Regional Director in writing of the areas, by counties, where farm production is impaired or threatened to be impaired, specifying the quantities, by types and sizes, of the property needed to relieve or prevent impairment in each area. Need for the property should be substantiated by facts sufficient to justify and support issuance of a certificate to the Surplus Property Board. A copy of this notification, including the justification for need, shall be forwarded to the AAA liaison representative.
4. Upon receipt of information that an Order has been issued by the Surplus Property Board, and after receiving notice of the date of sale of the property named in the Order, notify the County Committees within the designated area of the quantity, types and sizes of property to be sold and the date of the sale, in order that County Committees may encourage dealers to attend the sale.
5. A representative of the State Committee should attend each sale held in its State. In the absence of the AAA liaison representative, the State Committee representative shall assume his responsibilities.
6. Receive information as to the name and address of each dealer who purchases property at a sale, the quantity, types and sizes of property purchased, and in the case of trucks, the counties where he wishes to resell the trucks.
7. Notify the County Committees of the number, types and sizes of trucks on which the County Committees shall issue AAA certificates to farmers or farmers' cooperatives, and of the name and address of the dealers holding each such truck for resale. Certificates shall not be issued by more than one County Committee for any one truck.
8. Receive and examine copies of AAA certificates which have been completed by dealers, and determine whether the conditions of sale have been met.
9. Report any irregularities in writing to the Regional Director. Forward a copy of each report to the AAA liaison representative.

C. Responsibilities of County AAA Committees.

1. Upon receipt of a notice of sale from the State Committee, furnish local dealers with the information and encourage their attendance at the sale.
2. Issue certificates to farmers and farmers' cooperatives for the purchase of trucks as directed by the State Committee. Holders of certificates should be informed of the names and addresses of dealers who have trucks of the type desired for resale in the county. Certificates may be cancelled by giving five days

(Over)

written notice to the holder.

3. Certificates will be prepared in triplicate, the third copy of which will be retained in the County Office files and the original and one copy given to the farmer or farmers' cooperative to whom the certificate is issued.
4. Receive from each dealer who purchased a truck for resale in the county a copy of each certificate completed by him.
5. Record on the County Office copy the information shown on the completed copy of the certificate and forward the completed copy to the State Committee.
6. At regular intervals examine the County Office records to determine whether there are any outstanding certificates. When a certificate has been outstanding beyond a reasonable length of time, contact the holder to determine whether a truck has been purchased. If the holder has purchased a truck, procure the completed copy of the certificate from the dealer. If the holder has not purchased a truck and there is no justifiable reason for the delay, the certificate should be cancelled and a new certificate issued to another farmer or farmers' cooperative association.
7. Report irregularities in writing to the State Committees.

D. Responsibilities of Dealers.

1. Certify to the disposal agency that any property purchased will be resold only to farmers and farmers' cooperative associations located in the area designated by the disposal agency. In the case of trucks, he will further certify to the disposal agency that he is an individual, a firm, or a farmers' cooperative association engaged, in whole or in part, in the business of buying, selling, and repairing or reconditioning motor vehicles and that any trucks purchased as a result of his participation in the sale will be resold only to farmers and farmers' cooperative associations that hold certificates issued by County Agricultural Conservation Committees in the designated area.
2. At the time of settlement with the disposal agency inform AAA representative at the sale of the county or counties in which he wishes to resell the trucks.
3. Secure from the purchaser of each truck the original and one copy of the AAA certificate, complete the copy and forward to the issuing County AAA office. The original copy of the certificate should be retained.

Crawler Tractor-3
Supplement 2

SPECIAL SERVICES MEMORANDUM-212

SUBJECT: 3rd Quarter Quotas Crawler-Type Tractors

Attached is a tabulation of State quotas on crawler tractors for agricultural use for the 3rd Quarter of 1945 and a tabulation of State limitations on applications for states without a quota.

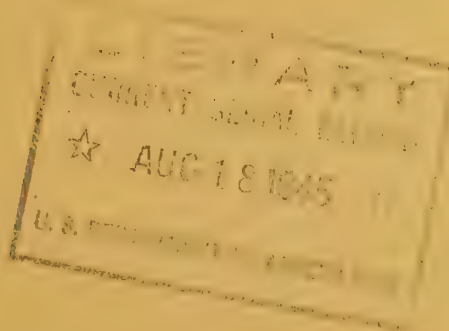

Special Services Memoranda 162 and 189 remains in effect except for the specific limitations on transmittals of applications to Regional Director for the third quarter which are outlined below.

STATES WITH QUOTAS

1. Applications for models of tractors for which quotas have not been assigned shall be limited to 2 applications for each model.
2. Applications in addition to assigned quota shall be limited for each model as follows:
 - A. Classes II, III, V and Vs - 1 application or 25 percent of the quota whichever the higher.
 - B. Class IV - 2 applications or 50 percent of the quota whichever the higher.

STATES WITHOUT QUOTAS

Applications from States without quotas shall be limited to the specified number of applications for each model indicated in the tabulation, except that the limitation is 2 applications for each model wherever no figure is indicated in the tabulation.

-2-
PROCEDURE

Procedure in issuing certificates to be followed as outlined in Special Services Memorandum 163, Construction 54, dated December 18, 1944. State Committees must not overissue the quotas assigned in this memorandum. A small reserve has been kept in the Washington office but no supplemental allotment will be granted before July 28. State Committees should return to the Washington office as early in the quarter as possible any portion of their allocation which will not be needed.

FORMS

1. Forms CW-200, CW-201 and CW-204 - no changes from those used during second quarter 1945.
2. CMPL-361, "Copper Wire Allotment Certificate". Revised May 25, 1945, sample shown below. Note changes in quarter designation, allotment number, and supplier's delivery date. Old forms must not be used after June 10, 1945, unless corrected in accordance with the changes noted.

is hereby assigned allotment number A-3-3Q45 for _____ pounds of copper wire. In order to use this allotment number to get copper wire the farmer must turn over this certificate to his supplier. If this certificate is not turned over to the supplier within 10 days of issuance, it is void and must be returned to the County Agricultural Conservation Committee by the farmer.

Issued _____ By _____, Chairman
Date _____

County Agricultural Conservation Committee

Received _____ By _____
Date _____ Supplier _____

NOTICE TO SUPPLIER

If the supplier is a warehouse, the farmer's order will be an authorized controlled material order. If the supplier is a retailer, the retailer may use this certificate to place an authorized controlled material order with a warehouse or mill and may, if he chooses, combine a number of these certificates received from farmers to place one authorized controlled material order. If the retailer orders from a warehouse, he must place his order in time so that the warehouse can ship not later than September 30, 1945, as warehouses are not permitted to make third quarter allocation shipments after that date. All orders placed in accordance with this paragraph must be marked "CMP Allotment Symbol A-3: Farmers' authorization under Direction 21 to CMP Regulation 1."
